

## HIGH VOLTAGE SENSORS

# HV-T-PROBE

For temperature measurements with Thermocouple Type K sensors from -200°C to +1200°C in high-voltage electrical systems in vehicles or test benches. Automatic probe identification.

### Features

- Compatible with MULTI-HV UIT
- Automatic Probe identification (similar to TEDS)

### Version

- Cable core end 25 mm long
- Temperature range -200 °C to 1200°C (-328°F to 2192°F)

### Scope of delivery

- HV-T-PROBE
- Factory calibration certificate (DAkkS optional)

### HV-T Measurement Ranges

Measurement Ranges [°C]	Resolution/Bit [°C]
-200 °C to 1200 °C	0,1 °C

**Code for order:** HV-T-L1-0-0

**Code for order:** HV-T-Probe-L1
